

# PROS & CONS

## A worker level through feedback

### Pros

- It has achieved an expanded vision of itself ( a ) , which allows a deeper self-knowledge
- Let you know how behaviors and attitudes impacting others; or settings get adjusted to the needs of others and the specific requirements of certain tasks.
- A good feedback program should be adjusted to the needs , expectations and requirements of the person concerned and therefore can not speak of a standard procedure.

### Cons

- The criteria are not optimal
- The constant change of thought taken from the criteria used developer ( not always optimal again).
- It could be taken as a means of justification for poor performance
